

## Fertilizer recommendation system for disease prediction

Team id - **PNT2022TMID19918**

### Literature survey:

| Title & Author   | Year | Technique                                       | Proposed system   |
|--|------|---|---|
| Soil Based Fertilizer Recommendation System for Crop Disease Prediction System - P.Pandi Selvi, P.Poornima | 2021 | Long or Short Term Memory algorithm.            | The proposed system was able to analyse the soil nutrient type efficiently, kind of leaf disease present in the crop and predict the fertilizer in a proficient manner. The approach was flexible, and can be extended to the needs of the users in a better manner |
| Farmer's Assistant: A Machine Learning Based Application for Agricultural                                  | 2022 | Image Analysis, Deep Learning, Machine Learning | A user-friendly web application system based on machine learning and web-scraping   |

|   |      |   |  |
|---|------|---|--|
| Solutions- Shloka Gupta, Aparna Bhonde, Akshay Chopade , Nishit Jain  |      |   | called the 'Farmer's Assistant'. With our system, we are successfully able to provide several features - crop recommendation using Random Forest algorithm, fertilizer recommendation using a rule based classification system, and crop disease detection using EfficientNet model on leaf images |
| IOT based Crop Recommendation, Crop Disease Prediction and Its Solution - Rani Holambe, Pooja Patil, Padmaja Pawar , Hrushikesh Joshi, Saurabh Salunkhe | 2020 | crop recommendation system, crop disease prediction, Internet of Things, Machine Learning | The ML and IoT based suggestions will significantly educate the farmer and help them minimize costs and make strategic decisions by replacing intuition and passed-down knowledge with   |

|  |  |  |  |
|--|--|--|--|
|  |  |  | far more reliable<br>data-driven ML<br>models. |
|--|--|--|--|
